

LEYON
beyond perception

LEYON-Gate Smart activation. Total barrier protection.

Advanced sensing solution

- Separate, adaptable detection areas with dedicated outputs
- Innovative LiDAR technology with outstanding resolution and accuracy
- Effective collision prevention for people and vehicles

Unique performance

- 3D detection zone with precise time-of-flight measurement
- Accurate, contactless detection of people and vehicles
- Designed to perform reliably even in harsh weather conditions

Simplified installation

- Replaces induction loops — no road works required
- Quick and easy setup via Web App
- Fast and simple configuration of virtual loops via Teach function
- No additional tools or mechanical adjustments required
