

WATER TREATMENT SYSTEMS  
FOR RESIDENTIAL AND  
INDUSTRIAL APPLICATION

- INCLUDED:**
- First refill
  - 2 straight connection, 1 right angle
  - 2 brackets for installation at wall
  - Screws and installation accessories

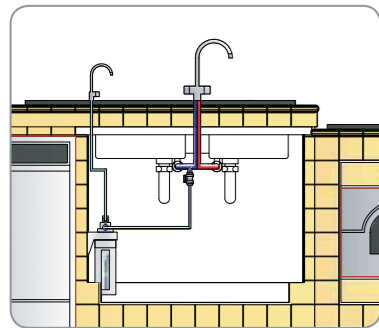

MININEUTRO

### NEUTRALISER FOR CONDENSING BOILERS

**MININEUTRO** is the new rechargeable MINI neutraliser for condensing boilers to regulate the pH of the exhaust, suitable for boilers up to 35 kW, it is equipped with straight and right angle connections for wider installation possibilities.

NEUTRAL 10" and NEUTRAL BOX are available for higher power systems.

INSTALLATION

### DRINKING WATER FILTER

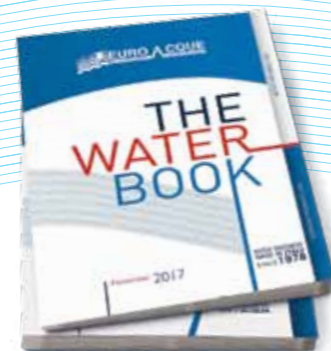

At home, thanks to river/ARGENTO/pro you always drink good water: river/ARGENTO/pro improves the organoleptic characteristics of the city water by removing unpleasant taste, odor and all the undesirable substances such as chlorine and its derivatives.

This system supplies drinking water at a cost up to 1000 times lower compared to mineral bottled water. The installation is extremely easy: it is sufficient to place the cartridge under the sink and connect it to the tap included. Completely made of stainless steel it shows through the LED light the cartridge lifetime (BLUE filtering, RED exhausted).

### INDUSTRIAL INSTALLATIONS

✓ Ask for the Water Book to discover the completerange of products

### WATER SOFTENERS

Automatic Water Softeners suitable for both residential and industrial application, available in different versions:

- Cabin or two bodies
- Timed and/or Metered regeneration
- Digital or electro-mechanicals
- Auto disinfecting
- Hardness Mixing valve included
- Duplex version (24/24 hours of treatment)
- Ion exchange resin for softening and iron removal
- Compact under-sink softener (mod. MINI/v)
- Portable Water Softener for heating system loading

### FILTERS

Plastic filters and cartridges  
A low-cost series of housings suitable for low pressure filtrate, dose polyphosphate or adsorb smell according to the cartridge included.  
Flow rate: 0,5 to 5 m3/h.

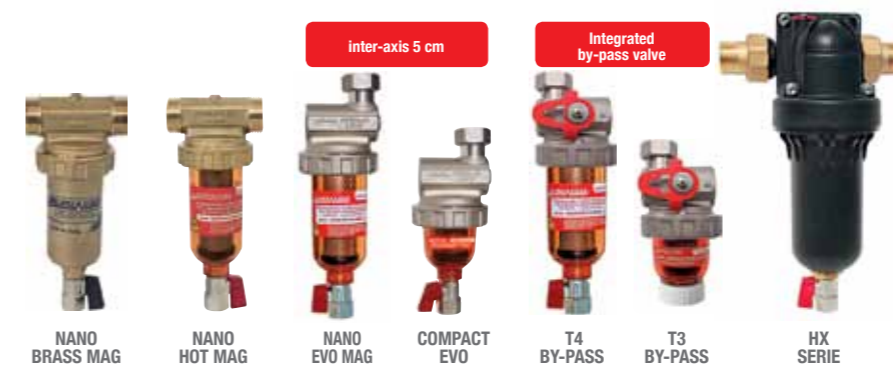

NANOFILTRO 1/2" - 3/4"/1"  
ECOFILTRO 3/4" - 1"  
ROTOSFILTRO 3/4" - 1"  
HF SERIE

### SELF-CLEANING FILTERS

One filter for any kind of application:

- **NANOFILTRO** 1/2" - 3/4"/1"  
The smallest self-cleaning filter
- **ECOFILTRO** 3/4" - 1"  
It combines low price with good quality and performance
- **ROTOSFILTRO** 3/4" - 1"  
Equipped with an internal cleaning system by brush for an excellent maintenance
- **SERIE HF**  
The brand new Cyclone semi-automatic filter with rotating connection

NANO BRASS MAG  
NANO HOT MAG  
NANO EVO MAG  
COMPACT EVO  
T4 BY-PASS  
T3 BY-PASS  
HX SERIE

### MAGNETIC FILTERS FOR HEATING SYSTEMS

Specific filters to eliminate the sludge and other deposits from central heating systems

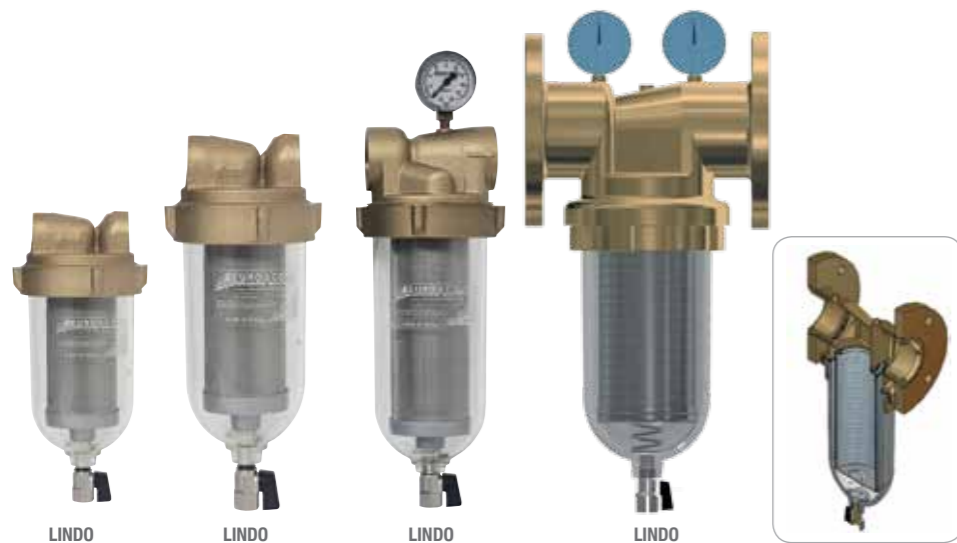

Suitable for horizontal installation

## SELF-CLEANING COMMERCIAL FILTERS

The Patented filter **LINDO** due to its particular shape allows the water to flow as a whirlpool around the filtering cartridge sending the little solid impurities towards the bottom of the housing to be

## PROPORTIONAL POLYPHOSPHATE DOSER

Thanks to their compact size they are suitable as an anti-scale system on wall hung boilers. Models **DX**, **DT** and the whole series **D/BLU** are equipped with a bypass for an easy and quick refill. the series **HD** is suitable for higher flow rates.

**CLICK** is a proportional dosing unit with automatic by-pass and rotating connection. it is equipped with a patented system to purge and by-pass automatically by pushing the "click" button and unscrewing the vessel

**DETAILS.**  
The new upgraded dosage system.  
Models **R**, **D** and **F**.

## HYDRODYNAMIC METERING PUMP

**SMART DOS** is the metering pump 100% mechanical available in three different models according to the connection type. Equipped with a new , upgraded dosage system. First refill included.

## ANTI-SCALE SYSTEMS

The magnetic anti-scale is a device designed to avoid or slow down the formation of scale deposits thanks to a strong magnetic field. No any maintenance needed.

The magnetic core creates a powerful field that breaks down calcium carbonate crystals and transforms them into aragonite, which can be easily flushed out in the discharged water.

## UV RAYS

Characterized by the low-cost of their installation and no chemical addition, UV lamps allow the abatement of bacterias without any modifications to the organoleptic quality of the water. The series **EUROS** is suitable for both residential and industrial applications

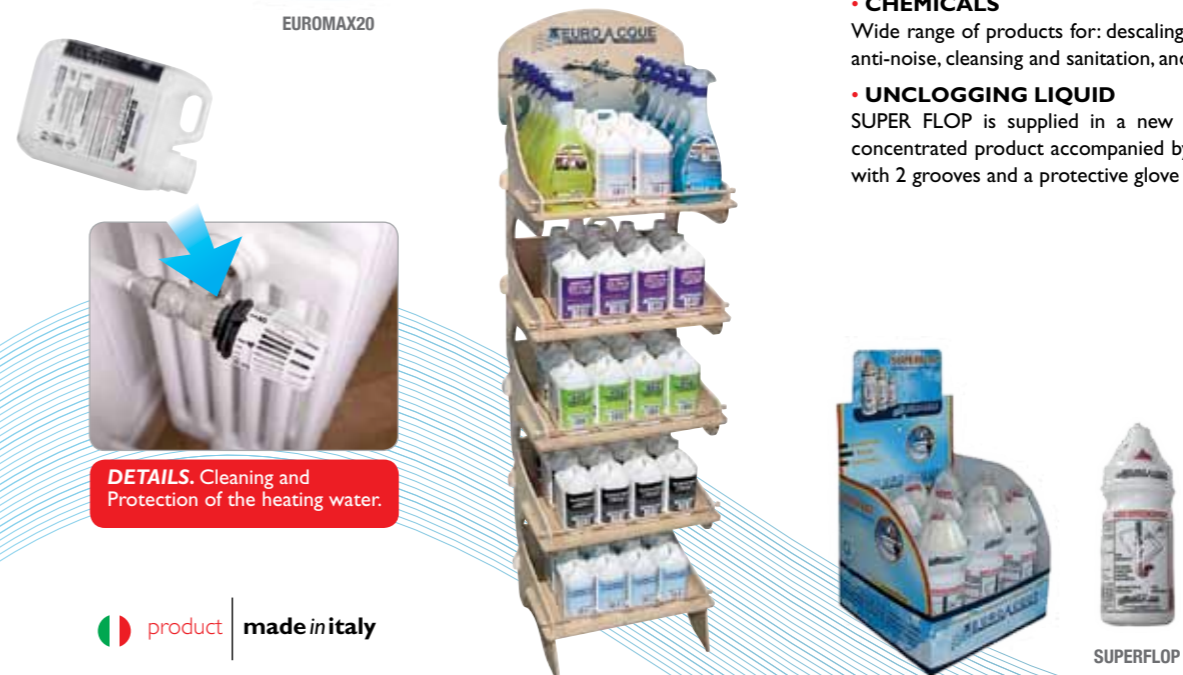

## OSMOSIS

- **OSMOKIT RO** is equipped with accumulation tank to nearly 200 Lt/day in normal operating condition. it is available in different models: With or Without booster pump and UV.
- **OSMOKIT MB2** is the brand new direct reverse osmosis system without accumulation tank. Extreme compact size for 60 Liters per hour in normal operating condition.
- **RO/IND** systems for industrial applications assembled on stainless steel skid and made on project according to the purpose and the flow rate required
- **THE OSMOSIS PROCESS**  
Reverse osmosis (RO) is a water purification technology that uses a semipermeable membrane. This membrane technology is not properly a filtration method. In reverse osmosis, an applied pressure is used to overcome osmotic pressure, that is driven by chemical potential, a thermodynamic parameter.  
Reverse osmosis can remove many types of molecules and ions from solutions, and is used in both industrial processes and the production of potable water. The result is that the solute is retained on the pressurized side of the membrane and the pure solvent is allowed to pass to the other side.

## CHEMICAL DIVISION

- **DESCALING PUMP**  
Models from the series **EUROMAX** are made of a special acid-proof material and they are equipped with a flow inverter to dissolve the scale from both sides of the circuit. Pumps are self-regulated thanks to the pressure flow rate controller. **EUROMAX/20** and **EUROMAX/20 TURBO** have also an ergonomic tank for an easier transportation and use.
- **CHEMICALS**  
Wide range of products for: descaling, anti-freezing, pipes protection, anti-noise, cleansing and sanitation, and much more
- **UNCLOGGING LIQUID**  
**SUPER FLOP** is supplied in a new 500 cc package with a super concentrated product accompanied by a practical drain saving funnel with 2 grooves and a protective glove packaged individually

**DETAILS.** Cleaning and Protection of the heating water.
