The Remote Friend You Always Wanted

Stop with wasting time, money and energy on going to your local dealer or specialist.
Live Technicians on remote. For every car brand. Solve your transmission electronic system problems from anywhere at anytime

ATR Remote setup is easy

With the ATR Remote you are able to work together with one of our specialists. Through an **Ethernet cable**, you can connect the ATR Remote to the car you're working on. **No matter the brand, our team of specialists is ready to analyze your problems on remote.** Through our tools, data, and knowledge we will complete arrays of functions and give you **the support you deserve.**

ATR Remote is available anywhere

No matter your location, ATR Remote can help you out. We operate fully on remote, and this is what makes us unique. There is **no need anymore to move a physical car to a dealer or specialist** who might be able to help you out. Our roots are founded in transmission technique, so we understand that **your time is valuable.** This is why we created ATR Remote. **Where you stop, we begin.**

ATR Remote is available anytime

When you choose for ATR Remote, you are able to use our services at any time preferred. There is no need to plan in a future scheduled date, you **create a ticket**, and immediately we start by analyzing the problem. A **direct and fast solution**, with **90% solving rate.** You are able to reach us between (CET) workinghours.

We cannot guarantee your car's internet and power supply. We recommend using a battery booster that can deliver +100 amps and installing a stable internet connection in your workshop. Our team is ready to assist you with any questions or advice you may need.

Live Technicians on remote. For every car brand

With our extensive range of in-house computer software, we have the necessary tools to analyze transmission IT problems effortlessly. The accompanying photos showcase some of these physical diagnostic interfaces, complementing the wide array of digital resources at our disposal

Create a ticket from anywhere

In the 2022, we have successfully resolved over 4000 IT software problems, each of which was meticulously addressed as a ticket. Our track record of resolving these issues demonstrates our expertise and commitment to delivering reliable solutions.

How it works

Connect the ATR-Remote to the internet

Connect the ATR-Remote to the internet using an ethernet cable. The ATR-Remote is connected to the server once the red and green light on the internet port light up continuously. Please check your internet connection if the lights keep blinking. The only things you need are: (1) an internet connected device, (2) the ATR Remote, and (3) a stable network. Once the remote is connected to the car's OBD port, you can request a service through our app.

Create a ticket

Once the ATR Remote is connected to the internet, please visit the website atr.obd.help. There, you can easily create a ticket to avail our services. We specialize in IT diagnostics, parts adaptation, and programming of new/used transmission computers.

Chat with our team

Follow the on-screen instructions to create a ticket and initiate a chat with one of our operators, who will gladly assist you. We are committed to doing everything within our capabilities to find a solution to your problem. With the help of error codes, learning values, and live data, we can accurately assess the potential issues with your vehicle. As we can only observe the electronic components, it may be necessary for you to perform a few actions for a thorough diagnosis.

Automotive IT becomes more sophisticated and complex everyday
We know that we are ready, are you?

Trusted by Customers

Working with ATR Remote, it's like you have the car to the dealer, with a couple more advantages: no freight costs to move the car to the dealer; no need for an appointment there; you are sure you get the job done good and quick by a professional technician.

We at Automatico are more than happy to have such a reliable support, and we recommend their services.

Automatico, Romania

The ATR remote is a whole innovation where you have all dealer brands with 1 device. That makes it more efficient and you don't have to go to a specific dealer with every car. The waiting times vary from 1 day to 1 month. I speak highly of the ATR remote services and it is a great improvement in the workshop.

With the ATR remote we can program just about any car remotely, so that we can help customers faster and do not have to draw another ticket from the brand dealers. Done while you're busy with other jobs! Ideal!

V-R-O, The Netherlands

The setup of the equipment is user friendly and straight forward. At ATR Remote, the ATR team will proceed with programming while our technicians are able to get on to another vehicle which is extremely useful.

ATR Remote is more cost efficient than most main dealers and are also willing to share help and advice to our technicians.

The guys over at ATR Remote are always on hand if we have any questions or queries about a vehicle. Their expert knowledge on vehicle programming is second to none.

Mister Gearbox, United Kingdom

TOGETHER

WE MOVE

FORWARD

40 years of extensive knowledge and skills

ATR Remote is part of the family company ATR Transmissies. With over 40 years of experience in the field of transmission techniques, ATR Remote brings unparalleled expertise to the automotive industry. Our team has accumulated extensive knowledge and skills throughout the years, enabling us to tackle even the most complex transmission challenges with confidence.

When you choose ATR Remote, you benefit from our extensive experience and proven track record in the transmission industry. Trust in our expertise to deliver exceptional results and surpass your expectations.

Reliable solutions, innovative approaches, and personalized service

Drawing from our decades of experience, in our main company ATR Transmissies, we have developed a deep understanding of transmission systems, their intricacies, and the latest technological advancements. This wealth of knowledge allows us to provide reliable solutions, innovative approaches, and personalized services tailored to your specific needs.

Plans and Pricing

To take advantage of our remote programming, adaptation, and diagnostics services, you will need to make the following purchases:

ATR Remote interface
Ethernet cable reel
Case

Once you have acquired these tools, you can start to reap the rewards of our services. Here are some examples of cars that have been successfully serviced with us.
