DOMUS

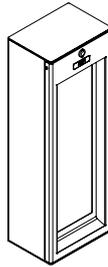

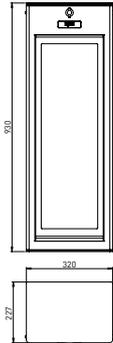

ROADSIDE TOTEM FOR URBAN AREAS

Made in Italy

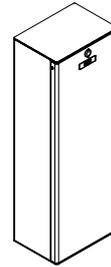

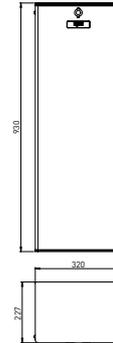

- DOMUS is a roadside totem designed for urban areas, suitable for housing control units and command devices for bollards
- Its internal capacity allows for the installation of two Rise bollard control units
- The cabinet can be made up of stacked modules
- An anodized aluminum panel measuring 629 x 210 mm is available for the installation of traffic lights, access control systems, and keypads
- Access to the control unit compartment is secured with a customized key lock
- Top cover with integrated traffic lights (Domus TL), light colour managed from the control unit
