

MURANO

multifunction display

The Murano Multifunction Display by Gussi Italia is a touchscreen display that can be installed conveniently on the center cap on select wheels. In combination with our Power Wings Sport, you can effortlessly take control; Your hands never have to leave the wheel.

The Murano Multifunction Display seamlessly connects with most electronic features on your boat. Control operations like speed, cruise control, ballast control, audio, volume, and more.

Customization

- **Company Logo:** This will be set as the “home” page of the display
- **Desired Screen and background colors:** Choose up to three colors, only one at a time can be displayed
- **Swipe display page options:**
Example – RPM, Speed, Direction.
Each page can display 2-3 functions. Ideal to limit to 3 pages, not including the home page. (See photo left)
- **CANBUS protocols:**
The Murano system must be programmed using NMEA2000 protocols or with the protocols of the CANBUS system manufacturer. To program the Murano system, it is necessary to know the protocols for each qualified function that the OEM wants the end user to access.
