

FLINraft⁺

The FLINraft⁺ is an inflatable, foldable, and floating solar system designed for yachts. It can be inflated with any dinghy pump and conveniently stored in its padded carrying bag. The modules are ventilated from behind and benefit from natural cooling due to their proximity to the water – ensuring maximum efficiency. The FLINraft⁺ is available in 300W⁺ (as seen on the picture) and 600W⁺ versions. In addition, multiple FLINraft⁺ modules can be combined to expand the available solar surface as desired, without sacrificing valuable deck space. The floating solar system rests like a tender behind the yacht and connects to the charge controller via a plug-and-play cable.

Power output	300 W ⁺	600 W ⁺
Average daily yield	1500 Wh	3000 Wh
Dimensions	1700 mm x 1150 mm x 150 mm	1700 mm x 2300 mm x 150 mm
Weight	14.5 kg	23.5 kg
Max. wind speed	35 kn	35 kn

⁺ Up to 20 % more power thanks to bifacial solar module (see page 3)

Cable is included

Foldable

1200 mm x 600 mm x 200 mm

Inflatable
