

MEGA ELITE MARINA SYSTEM

PRODUCT GUIDE

Product Highlights

Tried and proven high impact resistant commercial marina system

5-sided 50 MPA marine grade concrete structure with more concrete to areas where it is structurally required

Reinforcing mesh in concrete deck and wall provides longer overall design life

Pontoon base with fully welded PE base liner system

Large diameter pontoon to pontoon stainless steel connector bolts

Pontoons can handle high concentrated wave/vessel loads and transfer the loads through the mooring system

Allowance for heavy deck traffic and vehicle access

Stainless steel fittings for all connections

Designed with high freeboard to suit large vessel requirements as required

Cast Alloy Cleats & Heavy Duty Bollards where required

SL Grade polystyrene voids, 13.5 kg/m³ density

No timber or through bolts to constantly tighten or replace

Reinforcing bar perimeter beam where required

Service conduits to accommodate electrical, water and fire services

Low/zero maintenance required

Custom rotomoulded polyethylene service pits to accommodate electrical, water and fire services.

Heavy duty commercial D fender

The Superior Mega Elite Pontoon system stands out as the market leading, low maintenance solution for harsh conditions that will withstand the test of time. Units are connected using the innovative Superior Compression Coupling (SCC) - eliminates the need to tighten bolts, delivering unmatched long-term value.
